DETAILED ACTION

Reasons For Allowance

1. Claims 1-20 are allowed.
2. The following is an Examiner's statement of reasons for allowance:

The cited prior art taken alone or in combination fails to teach the claimed invention of ergonomic assessment, as claimed by Applicant. Specifically, independent claims 1, 3, and 16 disclose a communications network for communicating workplace information to the database and for communicating ergonomic assessments and recommendations to the workplace for implementation.

3. The closest prior art of Blasko et al (U.S. Patent Number 6,466,928 B1; dated 15 October 2002; class 706; subclass 046) teaches a business database, but fails to teach or suggest a communications network for communicating workplace information to the database and for communicating ergonomic assessments and recommendations to the workplace for implementation. To the extent that this feature does not exist in these claims, these independent claims (and their dependents) are held to be allowable over the prior art of record.

Art Unit: 2121

4. Independent claim 8 discloses breaking down at least one case into multiple problems if at least one existing case in the knowledge base is not substantially similar to at least one case of the client.

5. The closest prior art of Blasko et al (U.S. Patent Number 6,466,928 B1; dated 15 October 2002; class 706; subclass 046) teaches a business database, but fails to teach or suggest breaking down at least one case into multiple problems if at least one existing case in the knowledge base is not substantially similar to at least one case of the client. To the extent that this feature is not found in the prior art, the independent claim (and its dependents) are held to be allowable over the prior art of record.
